

Technology Agreement

We love technology!

Our class will use technology on a daily basis as we have been lucky enough to receive one to one Chromebooks in our classrooms! Throughout the school year, students will expand their knowledge of how technology can be used constructively in their daily lives. Students will create PowerPoint presentations, learn basic coding skills, complete online research, and much more!

This year we will also be focusing heavily on the importance of digital citizenship. Digital citizenship focuses on making smart choices such as staying safe and appropriate online, protecting private information, saying no to cyber bullying, and using technology for educational purposes only while at school. Misuse of technology will result in a PR point and loss of privileges.
